PROFILE

IT graduate from Emerson University Multan with practical experience through academic and personal projects in web development, Flutter, and IoT-based systems. Completed a BSIT final-year project focused on an IoT-based cardiac health monitoring system, combining sensor-based vital-sign monitoring, cloud data handling, and a mobile-app interface.

EDUCATION

Bachelor of Science in Information Technology (BSIT)

Emerson University Multan | 2023–2025

PROJECTS

IoT-Based Cardiac Health Monitoring System — BSIT Final-Year Project

Technologies: IoT sensors, ESP8266, Firebase, Flutter, GPS module (NEO-6M)

• Completed final-year project focused on monitoring vital signs and supporting remote observation of cardiac-health data.

• Worked with sensor inputs for pulse/SpO■, ECG, temperature, and environmental readings, with location tracking included in the system design.

• Used cloud-connected data flow and a Flutter mobile-app concept for viewing readings and supporting alert-oriented monitoring.

Personal Developer Portfolio

Technologies: HTML, CSS, JavaScript

• Developing a responsive portfolio to present skills and project work.

• Includes project summaries, responsive navigation, theme switching, and project filtering.

TECHNICAL SKILLS

Web Development: HTML5, CSS3, JavaScript fundamentals

Mobile Development: Flutter, Dart fundamentals

IoT & Cloud: IoT sensor integration concepts, ESP8266, Firebase

Tools: Visual Studio Code, Figma, Git/GitHub

STRENGTHS

Problem-solving mindset • Willingness to learn • Project documentation • Team collaboration • Attention to detail
